Sophiana Lighting Low Voltage Landscape Lighting

Up Light— Eagle Series 1.0

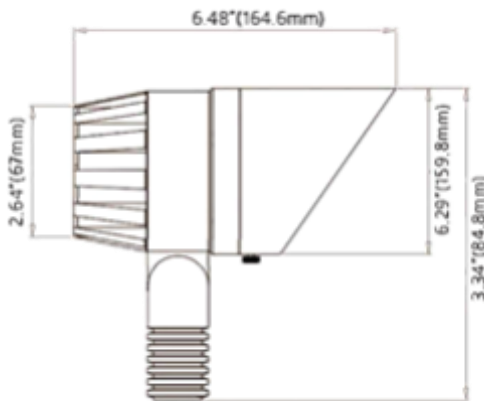

Product Description

Sophiana's Eagle 1.0 Adjustable Up Lights are professional grade integrated LED fixtures perfect for applications with varied brightness and beam spread. You can easily adjust the power of the light or the spread of the light beam without any tools. The compact size of this unit makes it a popular choice for illuminating a broad range of landscape including but not limited to individual garden features, trees, or cast a wider spread on the façade. This integrated LED Up Light is the first in our premium solid brass series to be rated IP67 and is completely sealed to prevent water damage for years and years.

Sophiana provides several accessories to help with a complete and professional installation.
